Former Resident Passes Away

Word received from Dearborn
Mich., intimates that Mr Neal
McEachern had passed away in
that town last week. Oldtimers
will remember deceased as having
owned and farmed a half-section
of land south and east of Stony.
He was well known in town here
at that time, having been a fre-
quent visitor here while farming.
He and his brother Arthur moved
to the Province of Saskatchewan
about 1918; and, later, deceased
moved to Dearborn.

Gravel for Main St.

The Sun is informed there is a
possibility we are to see Main St.—
or part of it—gravelled, ere the
winter closes in on us. The matter
is now in the hands of the Coun-
cillors. A delegation of these re-
cently visited the pits at Heather-
down, where road contractors have
been getting the gravel for their
contracts on the Jasper Highway.
The inspection proved to be satis-
factory, and it is intimated, when
the trucks which are now busily
engaged in hauling farmers' grain
to the elevators, are available for
gravel hauling, that a contract will
be signed and hauling commenced.

"Bringing In the Sheaves."

The long-wished-for spell of good
weather came at last, and to say
that the harvesters took advantage
of it, is putting it mildly. As intima-
te as the last issue, some thresh-
ers were going ahead, irrespective
of how the grain turned out, or
was graded, so long as they DID
get the grain thru the machines.
Other threshermen, however, were
a little more cautious, and waited
a few days, to make sure their
wheat would pass under the 14.6
of the moisture tester.

In a few cases reported, when
the threshermen got to the barley
stacks and started operations, they
found that the barley heads had
sprouted, but not to any consider-
able extent.

Every available truck that could
be pressed into service was on the
job, early and late, hauling to the
elevators. As an exchange states
the case: "There is quite a spread
between the official hours of day-
light credited to this season of the
year and those used up by thresh-
ing gangs."

If favorable weather continues,
it is figured that threshing opera-
tions hereabouts will be pretty well
finished up by the end of this
week.

"Hell Divers" for Tonight.

Another record crowd on Thurs-
day night at Kelly's Hall witnessed
Mr Goodman's film offering—
Bob Steele in "Texas Buddies."
Bob was at his best in this, his
latest Cowboy picture, and the
various incidents depicted in the
picture were greatly appreciated.
The opening picture "County Hos-
pital" showed a number of comical
situations, which sets one wonder-
ing if these could really happen in
real life in this year of our Lord.

This Thursday, Evg., the 18th,
Mr Goodman has a real film treat
for local movie patrons, this being
no less than that famous war pic-
ture "Hell Divers," which has had
extraordinarily long runs wherever
shown. In this picture will be seen
the redoubtable Wallace Beery
and the likable Clark Gable.

Lessons Of The Depression

Perhaps the wish is father to the thought but it is quite evident that, in steadily increasing degree, people are expressing the view that the depression which has hung over the world since the fog for the past five years is lifting, slowly perhaps but nevertheless surely, and that gleams of sunlight are seeping through for the encouragement of mankind and the restoration of confidence.

In support of this view statistics are quoted of increased business, rising prices, more employment, increased revenues for the railways, rising national revenues. Betterments of this kind are noted, not in one but in many countries, and from many quarters come reports that there is a growing tendency on the part of people with money to invest to again proceed to do so.

Whether this more optimistic viewpoint is justified we are not in a position to say, and it is just possible that the statistical betterment noted is the result of the injection of artificial stimulants into the arteries of business by governmental bodies, rather than the outcome of a natural and more substantial improvement in conditions. Whatever may be the underlying cause of this slowly returning confidence, it is undeniable that it exists, and people believe that the tide waters which have been running so strongly in an adverse direction for so long have passed the peak and are now beginning to flow in an opposite and more favorable direction.

Coupled with this, there is recognition in Western Canada that, while such betterments may be seen in other parts of the country and the world, there can be no marked improvement throughout this section of the Dominion until it is blessed with more favorable and normal climatic conditions, resulting in some profitable return to our agricultural population for the continuous labor they have expended. Unemployment has not been the curse of the vast majority of Western people. They have worked long and arduous hours, 365 days in the year, but Nature in an unkind mood for some years past has denied to our working farmers any profitable return from their labor; in fact, in thousands of cases no return at all. Loss has been added to loss, and the cumulative effect has been to throw tens of thousands of other people out of employment because there was no work to be had. Such climatic conditions will not permanently continue.

Possibly one of the best indications that the depression is passing is that people are beginning to take note of the lessons which it has taught. Some of these are of a purely material and practical kind. For instance, and despite a certain school of thought which urges that man should plan his activities from year to year, and, as nearly as possible, balance production with consumption, there is a growing recognition of the wisdom displayed in Egypt in the days of the Pharaohs when under the guidance of Joseph they laid by and accumulated reserves in the years of plenty to carry them through the lean years. It is more and more coming to be accepted as a truism that in Western Canada we must do likewise.

But above and beyond the material lessons taught by the depression, lessons, it is to be hoped, that have been well learned by many—there are moral, ethical, spiritual lessons, the importance and significance of which will, it is also to be hoped, leave a lasting impression.

Ritchie, the famous prize-fighter, is reported to have once said that he never knew how good he was until he got his first licking. Many of us have taken a pretty severe licking in different ways during the past five years. It sometimes does a man good to be thoroughly flogged. It may call up reserves of energy that he never realized were his. And this seems to be ought to be, to the credit side of the depression. Adversity brings out the strength of character of men and women, or the lack of it. Seemingly strong men have gone down and gone under; others have displayed an initiative and developed traits of character and strength which even they did not know they possessed.

Assuming that the fog of the depression is lifting, and that we are again slowly emerging into the sun and the light, now is a good time to take stock of what the depression has actually done to us and taught us as individuals and as a nation. If we correctly size ourselves up as individuals, and profit by our inventory of ourselves, the nation will be better, stronger, more enduring. This, then, is a time for realistic balance sheets, balance sheets of character, of habits, of motives, as well as, and even more important in the final analysis than balance sheets of money, stocks, bonds and chattels.

"I have just taken a real inventory," said a man who has had his full share of bad business breaks. "I've thrown out a lot of stuff I used to carry as assets. For instance, I carried on my payroll a lot of useless hangers who were called 'friends.' When I couldn't manage the upkeep any longer, I let them go. Then I found out that they had been standing in front of people that really were friends. I'd been spending time and money on people that didn't mean a thing to me, and neglecting those who did. Now I see a few special people often, and have a better time with them. I think, on the whole, I've come through the depression pretty well. The cash value of my estate has shrunk considerably, but that's balanced by a big increase in what can't be measured by any yardstick of dollars and cents. The result is, my net worth is greater. There's a good side to going broke."

How many people have been wasting time, money and energy upon things that really do not matter, and neglecting those that are worthy of care and make life what it ought to be and was intended by an all-wise Creator to be.

Has the depression taught you who reads this any lessons? Are you a neerer of character and slipped? Are you now showing determination to profit by the lessons learned. If so, with all its worries and difficulties and even sufferings, the depression may be turned to good account. It's up to you.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years you can do not experiment when you use it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

(Editor's Note: These articles on Character from Handwriting have aroused enormous interest. Many readers are sending in specimens of their own handwriting for a personal analysis. If you want your handwriting analysed, see the announcement at the foot of this article.)

A Grapho-Analyst's mailbox is very interesting. It is a reflection of people's hopes and fears, worries and problems—it is his mirror of life itself. And for each question, the Grapho-Analyst can supply an answer.

Hand writing shows so plainly the character of the writer. Grapho-analysis is an X-ray that cuts through the verbiage, and gets right down to the very nature of the writer.

A girl writes in tormented fashion, pleading for advice on how to deal with her brother. "He is making me miserable for herself and mother, and threaten to do bodily harm if the letter do not do what they are told in regard to some money that the men want. The writing of the father and brother shows greed and selfishness with a brutal will that sometimes gushes over into violence."

Another girl is having trouble with her boy friend. Is he to be trusted? There are many letters of this kind.

And very often, we can give a reassuring answer. Sometimes, our advice will hurt—but the truth is what people are seeking for.

A mother is very anxious to know the characteristics of her young daughters. And what talents they possess. In this way, she can encourage them along the lines in which they are seeking for, and in which they will be happy.

Another mother is perplexed about her boy. He is only for the child she has, but she doesn't understand him. Grapho-analysis reveals his hidden traits, and suggests a line for the mother to work along.

A young man from the West says his life has been miserable, and, try as he will, he cannot do anything right. His writing reveals the tremendous conflict in his nature, and the need for great control. He has a hard road to hoe before he can regain normality.

Letters show how many people are squares pegs in round holes. Real talents wasted because the possessor is in a vocation totally unsuited to him.

Opportunities lost, because people have not developed the essential qualities of will and determination.

Grapho-analysis is very helpful. It reveals not only the major characteristics, but also those hidden tendencies that are gradually looming up, and will, ere long, affect one's mode of life. If they are strong points, they can be developed. Often, they are potential weaknesses, and need curbing. Grapho-analysis shows the way.

What does your handwriting show? Let a skilled Grapho-Analyst tell you the secrets that your writing reveals. You will be surprised at the revelations. Find out the true character of your friends. Send specimens of the writing you wish analysed, and enclose 10c coin, for each. Enclose with 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. Letters will be returned to you as soon as possible, but please allow at least two weeks for your reply.

Old Ship Scuttled

Otago Was Once Commanded By Conrad The Novelist

Sixty-three years ago a small sailing ship of 348 tons, the Otago, left Liverpool for Port Charles, New Zealand. She did the voyage in the almost record time of 86 days, and many were the yarns told of her, both in the town and at her destination.

Now she has been taken out to sea for the last time and scuttled. It just did not pay to break her up. But her past was a tale of romance. She was once the command of Joseph Conrad, novelist, and later he made references to her in his books—"The Mirror of the Sea," "Falk," and "The Shadow Line."

Built in 1869, she put up some fine performances. Once she sailed 306 miles in 24 hours. Her last days were spent as a coal bulk in Hobart, Tasmania, a battered but proud vessel.

California has more than 17,000 trees with trunks at least 10 feet in diameter.

Aber Doubleday, of Troy, N.Y., founded the American national game, baseball.

World Peace

League Of Nations Society In Canada Organizing Mass Meeting

Canadians are vitally interested in world peace. Primarily this is true because of the humanitarian outlook of our people and because of the stress we rightly place upon law and order in all realms, not excluding that of international affairs. This general outlook is strengthened for us by two special considerations. Firstly, our position as a member of the British Commonwealth would make it exceedingly difficult for us to avoid becoming involved in any large-scale conflict. Secondly, our trade position as a great exporting country makes it exceedingly important for us that confidence, peace and financial stability be restored throughout the world.

The League of Nations Society in Canada is organizing a series of mass meetings throughout Canada late in October, 1934, with a view to bringing these and other important considerations before our people and developing a sound public opinion in support of the maintenance of peace.

The three signatories hereto, being the Saskatchewan members of the National Council of the Society, urge all communities in Saskatchewan to join with the rest of Canada in this demonstration by organizing local meetings and addresses at that time. Programs and necessary information and assistance can be obtained from the Society's office, 124 Wellington Street, Ottawa, on request.

Canada is not a militaristic nation, but the best safeguard against its becoming so and the best assurance of our influence remaining a steady one at Geneva and elsewhere abroad is the development of a strong public opinion within our own country. We therefore confidently and earnestly commit this program to our fellow citizens of Saskatchewan, L. C. Brouillette, Regina; Andrew B. Sibbald, Saskatoon; (Mrs.) Violet McNaughton, Saskatoon.

Submarines Made Safer

All the new submarines built for the British navy have two safety devices, one consisting of eye-bolts to which divers may attach a hawser in case of need, and the other being a battery of buoys which can be released from within the vessel to permit communication with rescuers.

BABY'S UPSET STOMACH Relieved!

Often in hot weather and occasionally at other times, little stomachs turn sour and acid. "When I notice any sign of sick stomach," says Mrs. J. Alphonsus Brown, Bayville, P.E.I., "I always give a Baby's Own Tablet." They quickly set things right and are very easy to take and quite safe. All common ailments of childhood including teething are promptly relieved with Baby's Own Tablets. Size a package of 12 tablets, 25c. a package of 48 tablets, 75c.

Dr. Williams' BABY'S OWN TABLETS

The shipments of livestock from Western to Eastern Canada for the first 36 weeks of 1934, ending September 7, included 62,560 cattle; 701 calves; 150,443 hogs; and 45,222 sheep.

Girl to Woman

Mrs. G. F. Pearce of 45 Cambridge St., Oak Ont., says: "When I was a girl developing, I was quite anxious, nervous, run-down and weak. I used Dr. Pierce's Favorite Prescription. This medicine strengthened my system, brought me to normal condition and I developed without any difficulty."—Clara, Buffalo, N. Y., for free medical advice.

The number of live cattle shipped in 1934 to the United Kingdom up to September 13 was 37,775 head, as compared with 36,229 head during the corresponding period of 1933.

Faster Way Now to Relieve Neuralgia

DISCOVERY ALSO EASES BAD HEADACHES
MUSCULAR PAIN OFTEN IN FEW MINUTES

Remember the pictures below when you want fast relief from pain. Aspirin eases even a bad headache or neuralgia in a few minutes. An Aspirin tablet begins "taking hold" of your pain practically as soon as you swallow it. And Aspirin is safe. For Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN, the method doctors practice. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Get tin of 12 tablets or economical bottle of 24 or 100 tablets.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to disintegrate and go to work.

What happens in these minutes in your stomach? Aspirin tablets start "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures

—ASPIRIN DOES NOT HARM THE HEART—

Radium Storage System May Result In Increased Use And Widen Scope Of Radio Activity

A storage system for radium rays whereby the precious metal can be kept at work 24 hours of the day, whether there are patients to be treated or not, was described at the International Conference of Physics by Professor J. C. McLennan, of the University of Toronto, who has been working in England.

The storage plan grows out of discoveries first announced by the late Curries, Dr. Pierre and his wife Marie, among the first to investigate radio-active elements.

They found that common elements—at least 50 of them—when bombarded by high energy rays became temporarily radio-active and gave off the same rays as radium for periods varying from a few seconds to a few minutes.

Prof. McLennan applied this principle, using five grams of radium under his charge. Normally, when not in use it was enclosed in a lead case to prevent the dangerous rays from getting about and causing injury, but the disintegration which causes the radiation would continue at the normal rate.

The disintegration has not been anything to worry about heretofore. First, because it would last thousands of years and second because nothing could be done about it.

Now Professor McLennan has imprisoned various metals in the lead box along with the radium. These include aluminium, boron and beryllium.

They pick up the radio-activity from the radium, he reports. Evidently the same thing happens to them as to the metals and other substances which the Curries have been bombarding with various kinds of high-powered rays.

What actually seems to happen is that a little of the bombarded substance changes into something chemically and automatically different than its parent. This bit of different or new matter does not last long. It blows up just like radium, only much more quickly.

This happens also to the metals which Professor McLennan imprisons under the full force of the radium rays.

After being removed from the radium chamber, these substances give off rays of their own. Whether the rays have the same effect on living tissues as radium is now under investigation. Prof. McLennan is using plants and small animals to test their effects.

If these stored rays are like radium, it appears possible that the medical men will have a whole Pandora's box of rays at their command and under such good control that they can have a two-minute ray or a five-minute one—or even a very hard ray or a soft-boiled one, according to the diagnosis of the patient's needs.

John Cunningham McLennan, O.B.E., is professor of physics and director of the physical laboratory at the University of Toronto. He is the author of numerous papers on radio-activity.

He was born at Ingersoll, Ont., in 1867 and finished his education at the Universities of Toronto and Cambridge. He was appointed scientific adviser to the British Admiralty in 1919 and in 1922 was royal medalist and Bakerian lecturer of the Royal Society of London. He is a past president of the Royal Society of Canada and the Royal Canadian Institute.

Had Met The Dragon
"I haven't had a bite for days," said a tramp to the landlady of the George and Dragon. "D'yer think you could spare me one?"
"Certainly not," replied the landlady.

"Thank yer," said the tramp, and slouched off, but a few minutes later he was back.

"What d'yer want now?" asked the landlady.

"Could I ave a few words with George?" queried the tramp.

The oldest national flag in the world is that of Denmark, which has been used since 1219.

W. N. U. 2068

Early History Of The West

H.B. Company Traders Here Long Before Explorers

Long before official explorers came with drums and trumpets to "discover" the west, Hudson's Bay Company traders had crossed the plains and reached the Rocky Mountains. This was one of the interesting discoveries by Prof. A. S. Morton of the University of Saskatchewan, who spent last year delving into the Hudson's Bay Company's records, which are stored in the London head office vaults.

The inside story of the Selkirk settlement on the Red River will be re-writing in several respects and the reason for fundamental change in the company's policy is made clear as a result of Prof. Morton's study of the journals and letters carefully filed more than a century ago.

By Ruth Rogers

DAYTIME CHIC FOR EARLY FALL AND A MODEL THAT CAN EASILY BE MADE AT HOME

A charming model is to-day's pattern which shows smart use of contrast. Paris is favoring for fall. It is especially nice in crepe marocain, famous couturiers are sponsoring.

The original in black, combined with a novelty ribbed fabric in gold and white for its contrast. Another scheme is mahogany brown crepe, which is deeply pebbled, with plaided tango colored taffeta contrast.

Black satin crepe is also fascinating for it with white bengaline contrast.

Style No. 483 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 yards 30 inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Impurities In Air

Survey May Explain Why Epidemics Occur In Cities Far Apart

The first day's results in an "air survey" over Philadelphia gave scant comfort to hay fever sufferers. An airplane bearing a scientist and his instruments went 1,200 feet aloft and "measured" 100 cubic feet of air to find what impurities it contained. Examination revealed 132,000 grains of pollen, 95 per cent. of which was ragweed. Dr. Theodore B. Appel, secretary of the U.S. State Department of Health, said the airplane tests might reveal why epidemics of sleeping sickness, infantile paralysis and influenza break out simultaneously in cities far apart. "It may be learned from this study," Dr. Appel said, "whether these germs are air-borne. Certainly, many epidemics that break out in communities widely separated cannot all be accounted for by human carriers."

The Dominion Marketing Board Has Had Many Problems To Deal With In Its Brief Existence

Lessons From The Gulls

Head Straight Into Storm And Let It Blow Past You

Blowing hard on the headland, the wind made walking, and even standing, difficult. Waves had driven and foam-flecked broke against the cliffs in continuous thunder. The lobsterman passing on to his home over the hill predicted that a wild night was coming. Watchers did not care to linger.

But living things were there that seemed to mind the tumult not at all. In their own way, they were perhaps enjoying it. A score of gulls were riding a hundred feet in air, heading directly into the wind, and almost motionless. They were maintaining position as easily as though calm weather was about them.

What superb streamlining nature provides for these birds of the air! Sharp bills, and streamlined, slender bodies, offered little wind resistance. Broadside on to the gale, the birds must have been swept away. But they were too wise to allow that to happen. Facing the wind, they seemed fairly to cut it asunder. There was nothing in them for the gusts to get hold of.

A white feather drifted down from aloft and fell within ten feet of us. For all one knows, it may have borne a message, if human eyes could have read the legend. In any event, what it said to one admiring spectator was this: "See how we birds do it. The way to meet a storm is simply to head into it, and let it blow past you. If you make yourself a small enough target, the wind may blow it out and do no damage." Christian Science Monitor

The Dominion Marketing Board, which was established recently has had many problems to deal with during its brief existence. Since the Natural Products Marketing Act is new legislation to most parts of Canada there is considerable uncertainty concerning its method of operation. The nature and volume of correspondence suggests that the board will be called upon to deal with a great variety of problems.

Two schemes which had been prepared by interested groups prior to the establishing of the Board have been dealt with and approved. One of these provides for the regulation of the exportation of apples and pears; the other deals with the marketing of British Columbia tree fruits. Both schemes appear to be operating with relatively little difficulty.

There is much interest concerning the procedure in submitting schemes and a little impatience at what appears to be delay in dealing with them. In that connection it should be noted that a scheme for the marketing of a product must be submitted by farmers or persons engaged in marketing. It is not the function of the Dominion Board to prepare schemes for the industry. When a scheme has been prepared, it must be submitted to the Minister of Agriculture at Ottawa with a petition indicating the amount of support back of the proposal. If the minister is satisfied that the scheme makes the submission represent adequately the producers of the persons engaged in marketing, he will submit the scheme to the Marketing Board.

Schemes cannot be dealt with hastily. They require powers which are quite significant and have an important bearing on many people and many interests. When a scheme reaches the Dominion Marketing Board it is first examined to determine whether it is in proper order for consideration. This may require correspondence with those submitting the schemes, as frequently the provisions are not clear. The effect of the scheme on producers and consumers must then be considered. If the scheme is to deal with export trade, consideration of its effect on the importing country and its reception by competitors must be given. It must be reviewed in the light of international relations and trade agreements. The legality of the proposals included in the scheme and their relationship to other acts and regulations of the government must be studied. A number of hearings may be necessary in connection with a single scheme.

It is obvious that a good deal of investment and work must precede the approval of any scheme. The time required for this will depend upon the nature of the proposal and the thoroughness with which preliminary work has been done by those submitting the scheme but in any case it may ordinarily be a matter of several weeks and possibly months.

The Dominion Marketing Board has a number of schemes dealing with a variety of products under consideration. During the past week five delegations have been heard by the Board with reference to different schemes.

Those interested in the Marketing Bill may receive a copy on application to the Secretary, Dominion Marketing Board, Ottawa.

Hard To Explain

Why Water Obtained From Great Depth Is Cool

An artesian well has been bored in Dakota over 2,000 feet in depth and a fine flow of water has been obtained from it. The well bored at the instance of Sir Adam Beck in London, Ontario, will be tested on account of the opposition it aroused. West Chicago has a well 5,981 feet deep. St. Louis has one 3,843 feet down. At Putnam Heights, Conn. there is one at 6,064 feet. One near Leipzig is 6,738 feet in depth. And still we are told that the earth is full of subterranean fire. The water is cool and fresh and pure from these depths. What's the answer?

The SNAPSHOT GUILD

USE THE FINDER

At what is the girl pointing? Why? ... What if? A good picture, but uninteresting because it tells no story and fails to explain itself. There is no question, however, about the snapshot of the hunter. It tells a complete story. Its composition is successful.

Listen to an on snapshotting beginner as he goes over a fresh batch of prints:

"Boy, look at that! Got that string of trout swell! But say—Bill's head is out of the picture! Now how did I manage to do a crazy thing like that?"

The answer is very simple. The lad taking the picture failed to use the view-finder which he made the most of. He probably saw that the string of fish was in view, but he quite overlooked the fact that the proudly grinning Bill was neatly decapitated.

Most modern cameras have two kinds of view-finders. First, of course, is the familiar reflecting finder—the kind into which you peer from above. Properly shaded, it will give you an accurate idea of what each shot includes. Then there is the "direct" view-finder, mounted on the top or side of the camera. In using it you hold the camera at eye-level and sight through two rectangular openings. What you see, the camera will get.

With either or both of these finders there is really little reason for failing to get what you want in a picture. Of course, there are limits, defined by the size and shape of the film and the capacity of the lens. You have to select the most interesting bits of a scene and concentrate on them.

When an artist does this, he "composes" his picture. Many volumes have been written on the subject of composition, but the whole idea may

be boiled down to this. A good composition is simply a pleasing arrangement of the elements of a picture, an arrangement that puts the emphasis on the most interesting feature.

A little care in using your view finder will, almost invariably, give you a well-composed picture. For your eye will reject an arrangement that is confusing or displeasing, it will warn you that somebody's head is going to be lopped off, it will reveal whether or not the finished picture will tell a story—the story you had in mind when you unlimbered the camera.

For "telling a story" is the essence of a good picture. The Chinese have a proverb, "One picture is worth ten thousand words." But the proverb applies only to good pictures.

Many a professional photographer spends hours studying the "view finder" of his camera before he makes a single shot. His success in business depends on his presenting vivid story-telling pictures. In our snapshotting we have no such weighty considerations. We have only ourselves and a few friends to please. But we can increase that pleasure vastly by pausing, just before we click the shutter, to check up our picture in the view-finder. If it's what we want—fire away! And, when the "flashy" pictures come back, we shall certainly not begrudge those few seconds of concentration on the view-finder.

RELIEVES COLDS WITHOUT "DOSING"

WORLD HAPPENINGS BRIEFLY TOLD

Winnipeg flying club officials have announced receipt of a new Cirrus Moth airplane, given to the club by the department of civil aviation. The club now has four planes in service.

Speaking before the Scottish Conservative Club William Ormsby-Gore, first commissioner of works, predicted the British general election would come sometime between May and October next year.

A message protesting against "the menace of haiteness in America" was received at the American Federation of Labor convention from the club, cap and hatmakers union, New York.

Leading prices of the Indian states have subscribed a sum corresponding to \$38,000—more than was considered necessary—for the erection of a statue to Lord Willingdon, viceroy of India and former governor-general of Canada.

James B. Hammond, 79-year-old astronomer and inventor, claims to have an instrument which can determine the relative position of planets both above and below the horizon. The instrument might revolutionize astronomy, it was said. Graham Ford Towers, director of the new Central Bank of Canada, at Basel, Switzerland, to attend a meeting of the board of directors of the bank for international settlements, said he was studying closely methods of central banks of emission in Europe.

A reported plan of Hon. Arthur Roebuck, K.C., attorney-general of Ontario, to set up a night court in Toronto to meet the support of Montreal recorders, it was learned. If Toronto inaugurates establishment of such a tribunal Montreal might possibly follow suit.

If You Eat Starches Meats, Sweets Read This

They're All Necessary Foods
—But All Acid-Forming.
Hence Most of Us Have "Acid Stomach" At Times. Easy
Now to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is due to acid indigestion... brought about by too many acid-forming foods in our modern diet. And that there is now a way to relieve this... often in minutes!

Simply take Phillips' Milk of Magnesia after meals. Almost immediately this acts to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach."

Try this just once! Take either the familiar liquid "PHILLIPS'" or, now the convenient new Phillips' Milk of Magnesia Tablets. But be sure you get Genuine "PHILLIPS'".

Also in Tablet Form:
Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

Canada's Defrosting Chamber

New Method Used in Handling Chilled and Frozen Products

A most important advance has been made in the handling of Canadian chilled and frozen products transported by ship and rail. The barge of water-vapor condensation has been laid: The Canadian government has constructed a special vapour-tight chamber of 30,000 cubic feet capacity at the Port of London, England, for handling chilled and frozen meat. The chamber is the result of experiments conducted by the National Research Council of Canada upon the defrosting of frozen foodstuffs and is operated by the Port of London authority. It is designed to prevent the condensation of water-vapor from the outside atmosphere upon the products after removal from the ship's holds. Thus, one of the big hauls in the transportation of frozen and chilled products has been removed.

The matter for some time has had the close attention of Canadian scientists. Quite recently the serious effects of moisture from the atmosphere upon foodstuffs removed from cold storage were exemplified in certain shipments of chilled poultry to the British Isles where the average outside temperature at the port of arrival was 55 degrees F. and the relative humidity about 85 per cent. Under these conditions condensation was very pronounced and led to a study of the problem. The method thus evolved of avoiding condensation on chilled poultry is, of course, applicable to all types of chilled products.

Steamship Nasopole Returns From Trip To Far North

The ice-scattered steamship Nasopole, commissioned by the Hudson's Bay Company, and carrying the Canadian government's 1934 Arctic expedition, has returned to Halifax.

As a result of heavy snow and ice conditions the Nasopole was not able to get as far north as planned. Captain Thomas H. Smellie said he had encountered snow and ice on the return trip also and was ice-bound for a week in James Bay and a week in Hudson Strait.

There were three women on board, Mrs. George E. Brown, of Gates Mills, Ohio, who with her husband had joined the vessel as tourist at Churchill; Mrs. Carol Saucier, nurse at the mission post at Pangnirtung, N.W.T., and Miss Millicent Blake, nurse with the Grenfell mission in Labrador.

There were 10 Royal Canadian Mounted Police officers, eight returning from their post at Port Burwell, Lake Harbor, Pangnirtung and Pond's Inlet. The others were Superintendent T. H. Irvine, officer commanding "G" division at Ottawa, and Quartermaster-Sergeant W. C. Tyack, who had completed an inspection of the eastern Arctic detachment.

Walking For a Wager

Saskatchewan Youth Has Already Covered Two Thousand Miles

With about 2,000 miles behind him and about four times that far to go before he can collect a wager he made with the mayor of Waldeck, Sask., Ernest Wall, of Waldeck, sauntered into Montreal, October 1.

Wall made a bet with his mayor that he could start with 10 cents in his pocket and walk 10,000 miles in one year. He set out from his home town July 6 and has walked ever since, travelling to Montreal across the prairies and the desolate north shore of Lake Superior. From Montreal he heads towards the maritime provinces.

To collect his winnings, the 21-year-old Saskatchewan youth must not travel on the same road twice. Nor must he snatch rides on freight trains. He must get the signature of the mayor of every city and town he visits and must obtain one signature for every mile he walks. He is not permitted to ask for aid or remuneration for services rendered, but can accept anything given voluntarily.

Benzene, or benzol, is one of the most important of the compounds of carbon.

Rome is to have a huge auditorium seating 5,000 people.

Agricultural And National Income

Farming The Chief Single Industry Of The Canadian People

Agriculture is the chief single industry of the Canadian people. Although in recent years its net production in value has been surpassed by that of manufactures, it is predominantly the principal industry of primary production. In addition to providing employment to more than one-third of the "genuinely occupied" males in Canada, agriculture provides the raw material for many Canadian manufacturing industries and its products in raw and manufactured form constitute a very large percentage of Canadian exports.

The net production of the five-eighths of the Canadian people who were engaged in what is termed the creation of "form utilities" was given in 1900 as \$3,216,746,735 to which the primary industries (agriculture, forestry, fisheries, trapping, mining, and electric power) contributed \$1,525,528,806, and the secondary industries (construction, custom and repair, and manufactures) gave \$2,144,233,476. Of the net production of the primary industries of \$1,525,528,806, agriculture was responsible for \$758,781,743, which is nearly equal to half of the amount produced. The various producing divisions of agriculture were field crops, fruits and vegetables, maple products, tobacco, grain and clover seed, honey, flax fibre, farm animals, wool, dairy butter, creamery butter, homemade cheese, factory cheese, miscellaneous factory products, milk consumed or otherwise used, poultry and eggs and fur farming pelts and animals.

THIS IS THE WAY TO HAPPINESS

There's nothing—absolutely nothing—to take the place of perfect health as the foundation of a happy life. And no better way than to get it than to turn to that famous tonic wine, Wincarnia.

Wincarnia is not a drug. It is simply the purest of fine wine with all the valuable properties of the 2½ lbs. of grapes which go to every bottle, combined with the strengthening elements of beef and guaranteed vitamin malt extract.

From your first glass of Wincarnia you will feel new vigour, new energy, new strength. You will sleep more soundly, wake more refreshed. In a few days you will have forgotten the irascibility of your former half-wild state. You will go through the most strenuous day at the top of your form.

Twenty thousand doctors have recommended Wincarnia for nervous disorder, anaemia, debility, and all run-down conditions. Start taking—and enjoying Wincarnia today. Your druggist sells Wincarnia.—Sales Agents: Harold F. Miltch & Co., Ltd., Toronto.

Trappers And Huskies

Transported By Plane

Former Month's Journey Now Made In Hour And Half

Freighting of 40 huskies, seven trappers and 14,000 pounds of supplies and equipment into the remote Barren Lands east of Fort Reliance on the eastern shore of Great Slave Lake is the task Pilot Conway Farrell, Canadian Airways Ltd., performed recently.

Each flight into the barrens is made in an average time of one hour and a half, compared with a month of gruelling portaging, canoeing and repacking work which the trappers had to do each summer before they became modernized and "took to the air."

In the old days the trappers went in by canoe, which they abandoned in the spring when they came out with dog teams. This necessitated a new canoe each year, so that they can actually fly in by aeroplane cheaper than going overland, beside avoiding a month's hard work, aviation officials here revealed.

SUNDAY SCHOOL LESSON

OCTOBER 21

THE CHRISTIAN AT PRAYER

Golden text: "Continuing steadfastly in prayer." Romans 12:12. Lesson: Matthew 6:5-15; Ephesians 3:14-21. Devotional Reading: John 17:17-26.

Explanations And Comments

The Christian Prayer, verse 6. Jesus bids his disciples take the opposite course, seek all possible privacy. When you pray, shut out the world, and shut yourself in with God—enter into your inner chamber, the place where you can be alone with God, and having shut the door, pray to your Father who is in secret. For Nathanael the place for prayer was under the fig-tree; for Peter, it was on the housetop. Jesus made the mountains and the garden his place of prayer.

The Fullest Prayer, verse 7. Jesus also cautioned his disciples to avoid such vain (empty) repetitions as the Gentiles used, who repeated the same words over and over, relying upon the words rather than upon their meaning. Do not pray by rote, like pagans, as Moffatt's translation. Compare the vain repetitions of the priests of Baal, 1 Kings 18:20, and of the pagans in their worship, 1 Thess. 5:17, and the rabbinical saying that "Prolix prayer prolongeth life."

The Model Prayer, verses 9-13. After this manner therefore pray ye. Note the simple, direct petitions of the model prayer. The Lord's Prayer as we call it, which Jesus gave them so utterly distinct from the vain repetitions of the pagans. After this manner therefore pray ye. This does not mean that the prayer which follows is the only prayer pleasing to God, nor that it should always form part of one's prayer. The prayer given is a model for all prayer in that it deals with divine and with human interests, with spiritual more than with temporal wants. There are six petitions in the prayer. The first three put God first: they speak of "thy name," "thy kingdom," "thy will," before the petitions about "our bread," "our sins," "our temptations." Our Father, who are in heaven. The prayer is alone only as far as other human beings are concerned; it is in the presence of the Heavenly Father, and must let the realization of that Presence fill his mind and heart.

Little Journeys In Science

THE MOON

(By Gordon H. Guest, M.A.)

Most familiar to us of all the planets is the moon. This satellite of the earth has been closely observed by astronomers because it is nearer to the earth than any of the other planets, rotating at an average distance of 218,818 miles from us. Calculated by trigonometry, its diameter is believed to be about 2,160 miles, and it has a surface of about one-fourteenth of that of the earth.

The moon receives its light from the sun, and what we call moonlight is really reflected sunlight. No traces of organic life are seen on the moon, and its surface is believed to be bone dry, with neither moisture nor gases on it. Observed through telescopes, it is believed to be covered with ranges of mountains, valleys, and craters. The highest mountains are believed to rise about 36,000 feet. The moon was in ancient times the object of many superstitions and was worshipped by primitive people. No definite theory is accepted as to its origin, but scientists from time to time have endeavored to explain how it was formed.

Henri Poincaré, a French scientist, believed that the earth was at first a pear-shaped mass, and that in its swift motion through space it threw off one end, the dislodged piece commencing to revolve on its own axis and taking up the position of the moon.

George H. Darwin, son of the great biologist, advanced the theory that in the formation of the earth the sun exerted great force on the earth's surface, pulling up huge tidal masses. With a particularly strong force, the theory continues, a mass of earth was pulled completely into space, forming the moon. Both these theories are accepted to some extent, but scientists still seek other explanations.

Some people are too honest to take advice they haven't paid for, and others are too wise.

A Roman amphitheater was discovered at Lyons, France, recently following a landslide.

Ogdens Is

As Ogden's Does

And Ogden's Fine Cut certainly does what any man who "non his own" cigarettes wants his favourite tobacco to do. Its coolness lasts to the final satisfying puff of every cigarette.

You'll find this cigarette tobacco easier to roll, cooler, milder, more pleasant—better by 10.

Ogden's Fine Cut and "Chanticleer" or "Vogue" Papers are a combination you just can't beat.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

P.S.—At any Police Hand Premium Store, or by mail, you can get a large booklet of "Vogue" or "Chanticleer" cigarette papers in exchange for one complete set of Police Hands.

Your Pipe Knows Ogden's Cut Plug

The oldest painting of the Virgin and Child in existence, done about 150 A.D., is now on a wall in the famous Priscilla catacomb in Rome.

Safety Of Children

Cold weather source of discomfort and danger

Children's skins are very tender. Fall and winter winds and dampness quickly make them tender, raw and sore. They need the protection of Hinds Honey and Almond Cream. This smooth creamy lotion gives protection and relief to hands, necks and faces.

Worse than the soreness, is the danger which lurks when sore skin becomes cracked and bleeding from constant exposure. Those open, smarting cracks in little hands can easily become infected. Apply Hinds Honey and Almond Cream generously to tender skins—its smooth, cool texture will soothe hands and faces after washing, and form an adequate protection against wind and dampness. An instant relief for chapped hands—a constant protection against them—Hinds Honey and Almond Cream has been the reliable remedy for old and young since 1872.

On sale at all drug stores.

Portable typewriters have been classified as musical instruments by the British Railways' Freight Association.

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vitality. Clear skin attracts. The healthy active girl is both happy and popular.

Perhaps you are not really fit yet when the day's work is done you are too tired to enter into the good times that other women enjoy.

Try Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Gives you more pep and more charm.

Remember that 98 out of 100 women report benefit. Let it help you too.

FEAR THE PEACE OF EUROPE MAY BE DISTURBED

Paris.—Fear the double assassination of King Alexander of Yugoslavia and Foreign Minister Louis Barthou of France might wreck the continent's peace as did the killing of Archduke Franz Ferdinand at Sarajevo 20 years ago, lessened as time passed without bringing any major developments.

But the 20 deadly bullets fired by Petrus Kalenien at Marseilles left France shaken politically and Europe nervous over what may come next.

In many quarters belief that Kalenien may have altered the course of events in Europe was freely expressed.

The question of the assassin's nationality, highly important because of its political implications, pre-occupied police over the continent, and everywhere authorities sought clues which might enable them definitely to identify him.

France's Surete National and authorities at Praha, Czechoslovakia, insisted the Czech passport found on Kalenien's body, which apparently had been visited by Yugoslav authorities at Zagreb, was forged.

Among documents seized in the homes of Yugoslav Separatists in Paris, police said, was one calling Alexander "tyrant king and traitor of his country."

Meanwhile, trouble for the government of Premier Doumergue appeared to be brewing over responsibility for failure to protect King Alexander, as groups of demonstrators on the boulevards shouted insults at police and Albert Sarraut, minister of the Interior, for failure to prevent the assassination.

Interpellations already have been filed in the chamber of deputies and certain French newspapers have criticized the government sharply, while opponents have suggested it is time to overhaul the government of "tragically weakened authority."

Premier Doumergue himself took over the duties of Foreign Minister Barthou.

Throughout Europe police are searching for information about a group of international terrorists believed to have plotted the assassination of King Alexander.

Meeting secretly in some remote Balkan hideaway, police believe, the band of assassins drew lots to determine who would give his life to slay the king of Yugoslavia.

The task falling to Petrus Kalenien, the gang is believed to have planned the assassination in the fullest detail and equipped the slayer before sending him over the French frontier from Vallorbe, Switzerland.

Declares War On Racketeers

Ontario Government Will Protect People Against Improper Financial Practices

Toronto.—Premier Mitchell F. Hepburn declared his Ontario government would "wage war without quarter through its securities commission on financial racketeers and all persons engaging in improper financial practices."

The premier made the statement following a meeting of the cabinet.

"To this end new regulations were passed to strengthen the arm of Securities Commissioner Godfrey and to place his commission on a self-supporting basis," the premier said in a long statement.

Receives University Appointment
Winnipeg.—Mr. Justice A. K. Dyck has been elected chairman at a meeting of the board of governors of the University of Manitoba, succeeding D. C. Coleman, senior vice-president of the Canadian Pacific Railway, who was recently transferred to Montreal. H. A. Bergman, K.C., was named vice-chairman to succeed Mr. Justice Dyck.

President Of Hospital Association
Edmonton.—S. H. Adams, K.C., Calgary, was elected new president of the Alberta Hospital Association at the closing session of the annual convention here.

W. N. U. 2068

Society Woman Abducted

Wife Of Wealthy Kentucky Oil Man Is Kidnapped

Louisville, Ky.—Mrs. Berry V. Stoll, young society leader and wife of a wealthy oil man, was seized from her fashionable home by a kidnapper who left a note containing a demand for \$50,000 ransom.

Rescued by the abductor, who gained entrance into the house on a pretext and left her maid bound and gagged, Mrs. Stoll was spirited away in an automobile.

Federal, city and county authorities immediately began a wide search. Mr. Stoll discovered the kidnapping when he returned home from the office late in the afternoon. There he found the maid bound and foot.

The maid said the abductor got into the house on the pretext of wanting to use the telephone. The maid was quoted as saying she "never saw a more fendish-looking man."

As soon as he entered the house the man drew a pistol, pointed it at her and forced the maid to help him bind Mrs. Stoll's hands with tape. He was unusually rough, the maid said, and this was evidenced by traces of blood found on the floor.

The abductor was described as being between 30 and 35 years old, about five feet eight inches tall, weighing about 130 pounds, having black hair parted in the centre.

Mr. Stoll later issued a statement addressed to the kidnapper and asked that it be published.

"Berry Stoll has just found the note regarding the ransom and arrangements are being made accordingly."

He declined to make contents of the ransom note public, but it was learned that in addition to demanding money it contained a threat that William A. Stoll, president of the Stoll Refining Company, was "next on the list." He is a brother of Berry Stoll, the vice-president, and is president of the Louisville Board of Trade. Stoll said the ransom note was found in an upstairs bedroom.

People Living Longer

So Insurance Companies May Raise Annuity Rates

Chicago.—People are learning to live so long that annuity insurance premiums are likely to be higher in the future.

Arthur B. Wood, president of the Sun Life Assurance Company of Canada, indicated that in an address before the American Life convention in which he warned that "if annuity premium rates are based on the assumption that recent past experiences will be repeated, they will probably prove insufficient."

He suggested that "to avoid incurring an undue loss, additional provision should be made for anticipated increase in longevity."

Outlaws Capture Missionaries

Chinese Take Three Church Workers Prisoners In Southern Province

Peking, China.—A dispatch to the British legation from Chungking, said three foreign missionaries, including Miss Grace Emblem, a British subject, had been captured by outlaws.

They were taken prisoners at Lu-huang, 80 miles east of Kweiyang, Kweichow province (southern China), the dispatch stated.

Advices from Shanghai said Miss Emblem is attached to the China Inland mission. The other captives are an Englishman and a Swiss.

Greater Service Promised

Edmonton.—Under the proposed health insurance scheme for Alberta, more people will get hospital service and more nurses will be employed than at present, stated Hon. George Howley, minister of health, when addressing members of the Alberta Hospital Association and the Association of Registered Nurses in joint annual convention.

King Confers Titles

London.—The official gazette announced that the king had conferred upon Prince George the titles of Baron of Downpatrick, Earl of Saint Andrews and Duke of Kent, in honor of his forthcoming marriage to Princess Marina of Greece.

H. C. GROUT

General Superintendent, Ontario District, of the Canadian Pacific Railway, who has been promoted to the post of assistant to the vice-president, with headquarters in Montreal.

Rise In Wheat Prices

Average Export Value Shows Sharp Increase

Ottawa.—The sharp rise in the export value of wheat in August, when it reached \$12,868,000, was more than maintained in September, the Dominion bureau of statistics reported. The quantity exported in September was 17,588,259 bushels and the value \$15,323,000, about \$300,000 more than a year ago.

The average export price in September was 87.1 cents as against 79.9 cents last year. During the first six months of the current fiscal year the export value was \$68,937,000 compared with \$60,279,000 last year, a gain of about \$8,500,000, the bureau states.

Refunding Loan

Believed That Original Amount Has Been Over Subscribed

Ottawa.—With the 1934 refunding loan an unqualified success no definite figures of recent applications were issued but it was learned the only reason the books were being left open was to enable further conversions of 1919 Victory bonds. The government was assured the original objective of \$250,000,000 would be more than reached but it was desirous of securing as many conversions as possible even if it were necessary to scale down some of the larger subscriptions to keep the total issue within the figure set.

Horse Brings High Price

Brandon, Man.—Believed to be the highest price paid in Manitoba for a horse in years, "Jack," a three-year-old draft gelding, Clydesdale, was sold for \$400 to A. Leslie of Watrous, Sask. Winner of the Manitoba grand championship, "Jack" will be exhibited at the Royal Winter Show in Toronto.

CZECHS FEAR FOR AILING LEADER

Dr. Thomas Garrigue Masaryk, the founder and only president of the Czechoslovak republic, is said to be slowly ailing, and political observers believe he will not be able to serve much of his third successive term, to which he was elected several months ago. Now 84 years old, President Masaryk has watched his "brain child" grow to manhood, with a powerful voice among European nations, and serve as the last outpost of democracy in dictatorship-ridden central Europe. He resides most of the time in his huge estate in the capital, Prague. Our pictures show the veteran leader, and a view of Prague.

Mining Town Growing

Jellicoe, Ontario, In Midst Of Real Estate Boom

Jellicoe, Ont.—A real estate boom has struck this taxless mining town as prospectors, geologists, miners and others rush to grab land and erect shelter against fast-approaching winter that snow will crack down on the scene of Canada's newest gold scramble.

All along the Canadian National Railway's right-of-way from the station to what was until recently Jellicoe's only pretence at a hotel, hammers and saws resound as the town grows like a mushroom. Mining companies are constructing living and storage quarters at the mining country base, trying to finish them before the impending freeze-up.

Lots have been rented by the railway along the right-of-way and beside the rusty sidings. Houses, shanties and new stores are being built. A new hotel-bunkhouse has been finished and all available sleeping space around its walls is rented, much of it permanently.

The problem of sleeping accommodation has been solved to some extent by arrival on one siding of a tourist sleeping car in which the railway company rents berths at nightly rates of \$1.50 for a lower and \$1 for an upper.

Follower Of Gandhi

Madeline Slade, Former Society Girl, Reaches New York On Mission

New York.—Madeline Slade, former English society girl, who nine years ago became "Mirabai," chief woman lieutenant of M. K. Gandhi, has arrived to "give Americans a clear conception of Gandhi."

She travelled third class on the Majestic, and said she regretted having been unable to use even more humble accommodations.

"Mirabai," daughter of a former admiral and oil magnate before the renowned social life to follow Gandhi, was dressed in homespun clothing, a man's coat, and cheap Indian sandals.

Miss Slade said she came on the invitation of the Rev. John Haynes Holmes, chairman of the American League for India's Freedom, for a lecture series.

May Return To Britain

Report Says Earl Of Egmont Will Take Seat In House Of Lords

London.—Preparations are being made at Avon Castle, Hampshire, for the early return of the Earl of Egmont, his wife and their infant son, according to the Daily Mail.

The earl, who is only 20 years of age, is living at present on his Alberta ranch near Calgary.

The Mail says it is the intention of the earl to return to Avon Castle before he reaches his majority next April and to take his seat in the house of lords.

SOME CONTROL OF INDUSTRY MAY BE INSTITUTED

Ottawa.—Suffering more widespread than that caused by the Great War had been brought about by unemployment, Tom Moore, president of the Trades and Labor Congress, stated in an address here.

"We are going to have industrial control in Canada whether we like it or not," he declared. "Industry has shown conclusively that it can not conduct itself."

"For the good of business itself, for the good of the people, in order that sweat shops which the Stevens' investigation has shown to be so prevalent may be abolished, some control will have to be instituted. But we must go carefully or we might establish a dictatorship."

"Legislation should be brought in to effect only after collective agreements between those concerned—employer, employee and consumer. It must be uniform throughout the Dominion. After that, the people should boycott all those who will not live up to the regulations and drive out those who will not play the game fairly. We must see that business is for public benefit and not for private profit."

Bringing of the British North America Act up to date, unemployment insurance and industry-control were three ways in which Canada could combat "rebellious feeling," which, he believed, was far more extensive than generally realized.

In considering unemployment insurance, Mr. Moore suggested certain provisions which he thought necessary for social legislation for such as insurance be contributory, as many as possible be insured, but not to include those who for physical or such other reasons were unemployed and who would be looked after by other means; benefits to be in cash; qualifications to be governed by the number of contributions made.

Although it had been said when unemployment insurance was first proposed that it would impoverish the country, stated Mr. Moore, since 1930 cash qualifications to be in direct relief and was now spending \$60,000,000 per month.

Chinese Charged With Possession Of Opium

Two In Saskatoon Alleged To Have \$5,000 Worth

Saskatoon.—War against narcotic peddlers, recently waged successfully in Montreal with the breaking of an important international dope ring, opened in Saskatchewan with the arrest of two Chinese merchants of Saskatoon in alleged possession of \$5,000 worth of opium. With the arrests police believed they had secured the leaders of an important dope ring in the prairies. It was believed the largest seizure in the history of the province.

The arrests were made under the direction of Detective Sergeant L. J. Black, of Edmonton, in charge of the narcotics division of the Royal Canadian Mounted Police in Alberta. Sergeant Black recently returned from Montreal where he participated in the breaking of the \$1,000,000 ring led by Pincus Brecher, wealthy New Yorker, who committed suicide after his conviction.

Those arrested were D. Lem, alias Dal Kook Lane, and Fred Howa, who also is believed to have business connections in rural points.

Returns From Orient

Victoria.—Hon. C. H. Cahan, secretary of state for Canada, and Mrs. Cahan returned here aboard the liner Empress of Japan after a holiday trip to the Orient. "It was purely a holiday trip, so I have nothing to say about business or my impressions of the Orient," he said. "I enjoyed my trip very much and I saw a great deal."

U.S. Crop Report

Washington.—The United States wheat crop was estimated at 496,982,000 bushels for this year by the department of agriculture, which also reported the indicated corn crop at 1,416,722,000 bushels, showing the ravages of this year's severe drought.

Stony Plain Sun.

Published Every Thursday at The Sun Office, Stony Plain.

Thursday, Oct. 18, 1934.

Advertising Rates:

More Money for Farmers.

Increased marketings and higher prices will result in nearly twenty million dollars being put into circulation this year, from Alberta's hog production — practically double that for 1933. These figures are based on estimates by Edmonton live stock officials that marketings will be around 20 p.c. greater than last year. The gains in prices are a big factor in the situation. From Jan. 1 to Sep. 30 the average price for bacon hogs at Edmonton yards was \$8.31 cwt. Over the same period 1933 it was \$5.03. Hog raisers also have cashed in to a greater extent on the 50c per cwt. for "selects."

Holborn Happenings.

The UFWA announce a dance to be held at Holborn hall Friday Evg., October 26. Barth's orchestra will furnish the music.

Local farmers are pleased at the prospect of the long-drawn-out threshing operations soon coming to a close.

The O.B. Joyful Club of young people from Stony held their last-of-the-season picnic down at the river on Sunday Aft., when games were played and a lunch served. Owing to the cool breezes prevailing, the bathing beauty contests were postponed until next season.

The Trautmans have just finished hauling in making barley for shipment to Calgary. This has been special-binned at the Robertson elevator, and is subject to inspection at the destination, when shipped by the carload.

CHICKEN SUPPER AND BAZAAR

Under Auspices St. Phillip's and St. Joseph's Parishes, at

KELLY'S HALL, STONY PLAIN, TUESDAY, OCT. 23rd.

AUCTION SALE, MOND'Y, OCT. 29

On the Farm of

Mrs. Ph. Trautman

1 mile South, 1 mile West, half mile South of Stony Plain.

Farm Machinery, Household Goods, Poultry, Swine.

Sale Starts 1 o'Clock.

Mike Goes to the Hoosgow.

At the local Court, Monday, Mike Remenesty, the shoe doctor at Carvel Corner, appeared before Judge McCulla on a charge of assault, the charge being laid by Mrs. Joe Frutch, on behalf of a minor. Mike pleaded "Not guilty." On the completion of the evidence, Mike was adjudged guilty by the Magistrate and sentenced to three months' imprisonment in the Provincial Jail.

School of Agriculture at Vermilion Reopens.

The Vermilion School of Agriculture re opens Oct. 30. Over 200 applications for admission have already been received. There is going to be a record attendance of girls, as over 60 applications are in.

Board and room is 80c. per day; and no fees or costs of any kind. Girls buy the material used in the dressmaking classes, and keep the garments for their own use.

The down age limit is 16 years, but this year's class will average from 18 years to 22 yrs. There are no entrance exams, and the work is of a very practical nature.

The boys do half their work in overalls and a considerable part of their time is spent in shop laboratories, and grain and livestock judging rooms.

The girls take a practical home makers course, for what better information can a girl have to fit her for life than a study of foods, nutrition, cooking, sewing, nursing, together with other things which make this the popular course that it is.

Free Courses in Agriculture For Students Over 16 Years.

In an advertisement appearing in this paper last week it was incorrectly announced that free courses in Agriculture and Home Economics would be given at the Olds and Vermilion Schools of Agriculture to boys and girls under 16 years of age. Obviously this should have read OVER 16 years of age.

LOST—Set of truck chains between Sinner's Corner and Stony Plain. Reward. V. Assinger.

For Sale, 1926 Chevrolet Coupe, in good shape; about 100 feet of Cement Pipes, 30" inside measurement. Edw. Briske, Stony Plain.

For Sale, 2d Hand Wagon on Grain Tank. R. Breitkreutz, Stony Plain.

For Sale—Five-year old Holstein Bull; dehorned, good papers; price reasonable. H. Gieselschus, Stony Plain.

For Sale—Buggy Gear. R. Breitkreutz, Stony Plain.

THE NEWS OF STONY PLAIN AND DISTRICT.

Mr and Mrs Michael made a motor trip to Wildwood on Sunday.

Stony Plain Hardware has on hand several good battery radios, which have been overhauled, and which are for sale reasonably priced. Hear these, when in town.

If anyone doubted that meat prices were down to rock bottom, a glance at the window display Mr Bjork has at the Sanitary Meat Market would set him right. Prime roasts of beef at 6c lb, and other pieces at 4c lb, puts the daily roast within the reach of all.

BETTER AND EGGS WANTED at The Royal Cafe.

Card of Thanks.

Mrs. J. Strassburger and family wish to thank the friends for their kindness and sympathy shown on the occasion of their recent sad bereavement; and also for the beautiful floral offerings.

The Big Difference.

The Mountaineer, Rocky Mountain House: "While according to newspaper write-ups, Mayor Houde of Montreal believes in equipping himself with plenty of new suits to make a good impression for an election campaign, Alberta Cabinet ministers believe in equipping themselves with plenty of new automobiles for the campaign. The big difference of course is, Mayor Houde buys his own suit.

"DON'T TAKE CHANCES WITH
INFERIOR QUALITY. LESS THAN
1/2 WORTH OF MAGIC MAKES
A FINE BIG CAKE. AND MAGIC
ALWAYS GIVES GOOD RESULTS."

says MISS ETHEL CHAPMAN, famous cookery editor of the Farmer

MAGIC costs so little—and you can always
count on better baking results. Actually—
it takes less than 1¢ worth of this famous baking
powder to make a big three-layer cake. Don't risk
poor-quality cakes by using inferior baking pow-
der. Always bake with Magic and be sure!

"CONTAINS NO ALUM." This
statement on every tin is your
guarantee that Magic Baking
Powder is free from alum or
any harmful ingredient.

MAGIC
MADE IN CANADA

THE TENDERFOOT

By
GEORGE B. RODNEY

Author of "The Coronado Trail",
"The Canyon Trail", Etc.

SNYPOISIS

"You've fallen heir to a half-share
in plenty of trouble," the lawyer told
Gerald Keene. "The Broken Spur has
been systematically looting the ranch,
and old Joe Carr, your partner, is
drinking himself into ruin."
But Keene decided to go see what
was happening for himself—not as
Gerald Keene, half owner of the
Hour-Glass Ranch, but as Duro
Stone, tenderfoot in a Montgomery
Ward westward outfit.
Dad Kane, desert rat and luckless
prospector till now, is returning to tell
Dustin and Spike Goddard, owners of
the Broken Spur ranch, who had
grubstaked him, of his discovery of
a rich gold mine, and shows samples
of this ore. He sees Broken Spur men
rustling Hour-glass cattle and pro-
tests against it.
(Now Go On With The Story)

CHAPTER III.—Continued

This time Spike scoffed openly. It
was no secret on any ranch in Seco
Valley that Edith Carr, the red-head-
ed, fiery-tempered daughter of the
old owner of the Hour-glass, did
exactly as she chose. So did her
father. . . . In most things for she
dominated even the dour old man
whom most men feared. Edith was
not red-headed for nothing and Dus-
tin had discovered it once to his as-
trow. When he and Spike had first
bought up the loose scrip that gave
them title to the Broken Spur, he had
vaguely noted the red-headed un-
formed schoolgirl who occasionally
went to the infrequent Valley dances.
Then five years passed; she became
the rage and he was suddenly aware
that the unformed girl had developed
almost overnight into the perfectly
formed woman whom men openly
coveted.

forgot that incident and more than
once he had planned revenge but no
opportunity came his way. That one
hot encounter marked Edith Carr as
the only person in the Valley worth
the time and patience to tame her
and Dustin swore to himself that
tamed she should some day be. Some
day he would bring her to heel.

He had sense enough not to try to
force his attentions on her. He knew
old Joe Carr too well for that for the
old man was one of the old breed
that held their women-folk sacro-
sanct. The man must be better than
ordinary to get his legs under old
Joe Carr's table where the pretty
Edith held sway. That was also the
beginning of trouble for the Hour-
glass ranch.

It was a big ranch. For miles its
wire flung up into the hills and its
broad ranges pastured many cattle.
But hard luck dogged old Joe Carr's
narrow heels. First beef dropped to
nine dollars! Then to six. . . .
Then a bucking pony slammed him
against a bucking-post in the corral
and broke his leg in two places. The
break healed imperfectly. It had to
be rebroken twice and the pain and
the irritation over being a cripple
when every man was urgently need-
ed, awoke the old fever that had
never really subsided since Edith's
mother was laid away in the little
burying-ground under the great
almond-trees—cotton-woods.

From day to day Edith tried gallan-
tly to stop that solitary drinking. She
saw her father go into his office after
supper; she saw the door close and
she knew only too well what was
taking place behind that closed door.
Twice she tried to force an entry but
each time she was repelled and the
door was locked. Sick at heart, for
she knew what the trouble was, she
left old Frank Crewe, the fore-
man.

"Is there no way to make him
stop?" she sobbed. "Oh, Frank!
You know what it means! He's too
good a man to go wrong at a time
like this."

Crewe nodded. "Joe's too good a
man to run off the straight at all,"
he said. "I've busted his bottles till
the back-coral looks like a bankrupt
glass foundry. Miss Edith, but I'll be
damned if I can make him see sense.
The size of the matter is that he's
just plumb worryin' himself into his
bed and he's drinkin' to keep out of
it. Darn him! He ought to know
that with times like they are those
two men Dustin and Goddard over at
the Broken Spur are, just settin' up
at night waitin' for a chance at him.
If he ain't darned careful they'll git
it too."

"They did get their chance and they
knew well how to take advantage
when it came their way. They both
knew what was taking place at the
Hour-glass. A drinking bout means
a careless bunk-house and any
ranchman knows what that means.
It spells disaster.
The result was not quick-moving.
It came with the slow growth of an
avalanche. That moved very slowly
at first till sheer weight overcame
inertia. Then it becomes suddenly
dangerous. That first slow danger
showed first in a slight lessening of
the number of calves branded.
Then a long line of fence broke down
and no one discovered it till too late.
Cattle strayed off the home range
and if they calved at all, brought
forth their young in hidden places
where no one discovered them till too
late. Then a few calves with slitted
tongues. . . . That told its own story
to ranged men. Calves
whose tongues were slit to keep them
from suckling their own dams. . . .
Then followed a gradual drop in the
grade of the stock. . . . Any one
could see it! And finally the open
hazel row over Soda Springs.

High Heaven alone knew why
those pools were called Soda Springs.
There were three of them; great jets
of clear, cold water that sprang from
the wall of the upper valley and

formed a deep pool at the end of the
canyon. In that great pool water-
cress grew rankly and cattle stood
knee-deep in the water under the great
trees. Soda Springs was a constant
and never failing source of water
supply even in the long Dry Season
when no rains fell. To the sick and
injured Joe Carr the new came like
a thunderclap that Dustin and God-
dard had brought suit over the val-
idity of his own claim to the ownership
of those springs. No one had ever
thought to question his ownership be-
fore Dustin raised it and Dustin
would never have thought of it but
for a word from a drunken "Nester"
from whom he and Spike bought the
"scrip" that gave them a question-
able title to the Broken Spur. No
one had there in time of need. The
Springs might as well have been on
the Open Range.

But the days of the Open Range
had passed and along with them went
the old-time spirit of freemasonry
that made all men free of water and
grass at need. It remained for the
Broken Spur to force old Joe Carr to
defend his title to those Springs by
fencing them and barring them to the
public. It made him none too popu-
lar. Where old Joe had once been
the Nestor of the cattle men in Seco
Valley, he was likely to become the
Thersites, thanks to the machinations
of Dustin and Goddard. He knew the
cause of it all. He knew that drink
added to the spirit of aggravation al-
ready aroused by Dustin and God-
dard was making him unpopular
where he had once been a favorite,
but he could not give way. Finally,
dour, silent because he had none to
talk to, bitter with hate and wrath
at his own inability to keep abreast
of the times, he saw his ranch slip-
ping into the cattle depression. It
did not improve his temper to note
the success of the Broken Spur.
(To Be Continued)

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile
—No Calomel necessary
For you to feel healthy and happy, your
liver must pour two pints of liquid bile into
your system every day. Without this bile,
trouble starts. Poor digestion. Slow elimination.
Constipation. Nervousness.
How can you expect to dine up a situation
when your liver does not pour out its
bile, oil, mineral water, inactive easily or
at all? Buy Carter's Little Liver Pills. Purely
vegetable. Safe. Quick and sure results. Ask
for them by name. Refuse substitutes. See, at
all drug stores.

Some Consolation

The new governor of the Bank of
Canada is said to have been "no
marvel at mathematics" during his
school days. This should prove con-
soling to many a schoolboy who ex-
periences difficulty in wrestling with
the mysteries of that accursed trio:
Algebra, Geometry and Trigonometry.

Movie Fan Abroad
Guidé (proudly):—"And this—is
the Castle of Starnfels."
Tourist—"Yes? What picture was
it built for?"
Guidé—"But, my dear lady, this
schloss was erected in 1392."
Tourist—"Well, I'm not familiar
with many of those early films."

For the first 37 weeks of 1934, ending
September 13, the number of books
graded in Canada was 2,085,449. In
the corresponding period of 1933, the
number was 2,210,670.

EDWARDSBURG CORN BRAND CORN SYRUP

The famous energy-producing
sweet—an easily digested food
invaluable for infants, growing
children, and enjoyed by the
whole family.

A product of
The Canada Starch Co., Limited

From White To Blue

Buffalo's surgeons are now men in
white no longer; their surgical dress
is blue. "Blue is preferred," Dr.
James Borrell explained, "because it
does not reflect the rays of light, as
did the white. Asked to comment
on the move, a number of prominent
surgeons said it was all the same to
them, black, white, blue or green."

CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to
keep false teeth in place—use a reliable,
recognized one which dentists prescribe
as Dr. Wern's False Teeth.
The largest seller in the world—grips teeth
so secure yet comfortable they feel natu-
ral. Positively no slipping or clicking—
blissful comfort assured all day long.
Forms a special comfort cushion to pro-
tect and soothe gums. No colored, gum-
my paste—keeps mouth sanitary, breath
pleasant. Inexpensive—all drug stores.

As the second largest supplier of
wheat flour to Italy during 1933, Cana-
da increased the export of the
commodity by 45.5 per cent. as com-
pared with 1932.

Kidney Troubles

cause poisons to accumulate in the sys-
tem and bring on persistent Backache,
Lumbago, Rheumatism, or Sciatica.
Take Gin Pills to restore the kidneys to
a healthy condition and eliminate the
poison from your system.

A Book You Should Own

A collection of famous formulae
and simple methods. Seven
leading departments thoroughly
indexed.

Recipes for the home cellar,
the druggist, the chemist, toilet
articles, the household, farm
and dairy; all trades and pro-
fessions. NOT A COOK BOOK.
This valuable collection of
standard formulae has been
carefully built up over a long
period of time, resulting in the
most complete book of formulae
of this sort ever compiled.
Size 5 1/2 x 7 1/2. 368 pages.

Do you waste Food?

Of course you
don't waste
food intention-
ally. But
how much do you
waste without know-
ing it?

How often have you thrown out part of a loaf
or the remnants of a cabbage or even the dried
out carcass of a chicken?

These and other left-over foods can be used
to make tasty dishes if you keep them fresh
—and you can keep all foods fresh by wrapping
them in Para-Sani Heavy Waxed Paper.

Para-Sani has dozens of kitchen uses—wrapping
baking tins, wrapping sandwiches, preserving
the crispness of lettuce and celery. You'll
find the self-cutting Para-Sani green box a
great convenience and a money saver.

A cruise that leaves the beaten track of world tour ships to explore the changing worlds of Africa and South America has been planned by the Canadian Pacific for the 21,000-ton liner Empress of Australia this winter.

In three months, 96 days to be exact, this great white liner will circle the dark continent of Africa via the Mediterranean and the Indian Ocean, cross the South Atlantic, calling at lonely Tristan da Cunha, to visit the South American continent and the West Indies. There are altogether 26 ports in 22 different countries on the schedule for this new Mediterranean-Africa-South America tour. Departure will be from New York on January 18 and return there on April 24.

Madeira, Gibraltar, Barcelona, Monte Carlo, Nice, Naples, and Athens will be visited during the European part of the cruise, then Palestine and Egypt. In East Africa the Empress of Australia's cruise party will spend three days, visiting Mombasa in Kenya Colony, the island of Zanzibar and Dar-es-Salaam, the capital of Tanganyika. En route to Lorenzo Marques, Portuguese East Africa, a call will be made at Majunga Bay, on the French island of Madagascar.

Two whole weeks are spent in South Africa, forming part of the experience of the cruise party, which will reach Durban on March 5. Calls at Durban and Capetown are on the liner's schedule, but five optional excursions by special trains will be made through the interior.

The Western Hemisphere will be reached again on March 28, when the Empress docks at Buenos Aires. Two days will be spent in this gay capital of the Argentine and a day at Montevideo, capital of Uruguay. The coffee port of Santos, Sao Paulo, and beautiful Rio de Janeiro will be the Brazilian place of interest visited, then the final ten days of the cruise will be spent in the Caribbean waters, calling at La Brea and Trinidad, Port of Spain, Kingston, Jamaica, and Havana, Cuba.

Record Harvest Up North.

Reports of the big yield of vegetables in the Wembley district are to hand. Gus Gitzel reported a yield of 600 lb. to the acre on potatoes. Val Mayer had one potato weighing 58 oz. Turnips of 20 lbs. each are common and monstrous cabbages go to make it a record harvest.

Farmers gave freely of their potatoes and vegetables, loading 3 freight cars, to help the less fortunate in dried-out districts.

FUNERAL OF ONE OF THIS DISTRICT'S REAL OLD TIMERS.

Large Number of Friends and Neighbors Pay Last Respects to the Late Jacob Strassburger.

Jacob Strassburger passed away, in Edmonton, on Friday, Oct. 12, at the age of 70 years.

Deceased was one of the real oldtimers of Stony Plain district, coming here from St. Louis in the year 1892, and entering on a homestead two miles south of the present Stony Plain, on which place he had resided up the time of

No Date Set for Convention.

It appears now that the chances for holding a UFA Convention for Stony Plain Constituency are fading, as the Executive Committee have not, as yet, taken action in the matter. Farmers have been too busy with harvesting operations to attend meetings.

being taken to the hospital. He was an industrious and enterprising farmer, and was an extensive farm land owner, his holdings extending down to the Holborn district. He was adept in raising flowers and vegetables, and on these he had received many prizes, both at Stony Plain Fair and Edmonton Ex.

He leaves to mourn his loss besides his loving wife, three sons Jacob, Fred, Gottlieb; 4 daughters, Mrs Dringenberger, Philippina, Salome, all of Stony Plain; Louisa, Edmonton; 7 grandchildren, including Carl Pizler.

The funeral service was held Monday afternoon, with the Rev Willing officiating. Interment was made in the family plot, in Beechmont cemetery.

Funeral of Samuel Harmel.

Mr Samuel Harmel passed away in an Edmonton hospital on Friday, Oct. 12, aged 72 years.

Deceased at one time operated a farm a few miles west of Stony Plain, but moved away about 1918. His 2 sons, Fred and Adolph are now operating the former Government Farm, at the head of Main street.

He is survived by his wife; 1 sister, Mrs Pashko, Morris, Man; 3 sons, Edward, Fred, Adolph; 1 daughter, Mrs R. Isherwood, Edmonton; and 2 grandchildren, Ellen and Dorcen Isherwood.

The funeral services were held Monday, the 15th, in Edmonton. Rev. C.G. Stone, pastor of First Baptist church, officiated; assisted by Rev F. Benke. Interment was made in Edmonton cemetery.

4. EQUIPMENT NECESSARY

YOU read, in our last article, of the two traps, placed at Stations 1 and 7, respectively. It is essential that the traps be housed. Apart from the weathering protection that this affords, protection must be given to the two trap boys. Both houses may be of exactly similar construction, except that the high trap at Station 1 must be raised to bring the trap door 10 feet of the ground, whilst the low trap at Station 7 has the door 3 feet up.

Traps may be obtained for very little money, although, of course, better ones may be bought for more money. Your local sports-goods dealer will gladly get you complete descriptions of various makes of traps—of course, the better they are, the more satisfactorily they will operate. On the whole, though, it is as well to keep the lay-out as simple as possible. It is the most practical in the end.

Gun racks are a necessity. Any carelessness in standing or laying down of guns should be absolutely prohibited. Safety nets, too, made of chicken wire or fish netting, should be erected behind each trap house. These will prove to be a decided economy and will save many clay targets.

Later on you may want to build a club-house to provide a pleasant place for your members to congregate between rounds or during stormy weather. This again will depend upon your tastes and resources, and may be built so as to lend itself to expansion as the club grows. Windows should overlook the field, and the door may be placed at one end. Of course, with this as with other items of equipment, the cost can be kept down at the start. You will find that the clay birds are also very inexpensive—amazingly so, when one has experienced the thrill that they supply.

This is No. 4 of a series of 13 articles on Skeet Shooting. Cut it out. When all have been clipped, you will have a complete writing-up of this sportman's sport which is rapidly becoming the rage across Canada.
